## WHY SHOULD I GET ONE ?

Energy efficiency improvements always come with a reduction in monthly gas and/or electricity costs. Provincial and federal programs also offer financial assistance to people who apply for and carry out environmentally-friendly renovations, and who retrofit their property to make it more energy-efficient.

## GOVERNMENT-CERTIFIED

Our energy assessments and recommendations help reduce GHG emissions by over 150,000 tons of CO2 equivalent per year, resulting in energy savings of over 360,000,000 kWh. In addition to making a positive contribution to the fight against climate change, these reductions generate annual savings of around \$36,000,000 for our customers.

## ELIGIBLE BUILDING

An energy audit is an in-depth analysis of the energy consumption of a building, whether residential, commercial, industrial, or institutional. It helps identify areas and systems where energy is being wasted, and suggests improvements to optimize energy efficiency.

## WHERE DO WE OPERATE ?

- Nova Scotia
- New Brunswick
- Quebec
- Ontario
- Manitoba
- Saskatchewan
- Alberta
- British Columbia

We actively collaborate with CACEA.
